ARJUMA TILAHUN JALATA

SOFTWARE ENGINEERING STUDENT
Addis Ababa Science and Technology University

PROFESSIONAL PROFILE

Third-year Software Engineering student at Addis Ababa Science and Technology University with academic project experience in C++, MySQL, and HTML5. Built a multi-page personal portfolio using semantic HTML, validated forms, multimedia, interactive elements, and the HTML Canvas API. Also contributed to a team-based Parking Management System using C++ and MySQL. Interested in building practical software solutions and continuing to develop skills in web and software development.

EDUCATION

BSc in Software Engineering | Addis Ababa Science and Technology University (AASTU)

October 2024 – Present | Third-year student

Relevant academic areas: Programming, Database Systems, Data Communication, Software Engineering, Discrete Mathematics, and Computer Organization and Architecture.

TECHNICAL SKILLS

Programming	C++ (coursework and group project); Python and JavaScript (learning)
Web	HTML5, semantic page structure, forms and validation, multimedia, captions, embedded content, interactive HTML, Canvas
Databases	MySQL, SQL fundamentals, database-backed application concepts
Tools	Visual Studio Code, Code::Blocks, Git, GitHub, W3C HTML Validator

ACADEMIC PROJECTS

Personal Portfolio Website | Individual Academic Project

Technologies: HTML5, Git, GitHub

Developed a three-page personal portfolio consisting of a home page, projects page, and form confirmation page. Implemented semantic HTML structure, metadata, validated contact form fields, audio and video elements, WebVTT captions, embedded YouTube and Google Maps content, dialog and details elements, skill meters, degree progress, and Canvas-based graphics. Validated the HTML pages with the W3C Validator, achieving zero errors and zero warnings.

AASTU Parking Management System | Group Project

Technologies: C++, MySQL, MySQL Connector/C++

Worked with a team on a parking management application organized into administrator, customer, main, and utility modules. The project uses a MySQL database and includes separate administrator and customer roles, parking slot management, VIP parking options and rates, and password-handling functionality.

CORE STRENGTHS

Problem-solving mindset • Team collaboration • Structured programming • Attention to detail • Willingness to learn • Interest in practical software development

LANGUAGES

English, Amharic, and Afaan Oromo — proficiency levels not specified.
